

From House of Roots
HUSH FANS,
Silent
Efficient and
Aesthetic

Pure Bliss; without compromises!

The Hush range of fans focus on a variety of ease-of-access features that will be helpful to the users. A remote control that lets you control 8 functions of the fans ranging from its rotation speed to direction, HUSH offers you control and flexibility on the product's behaviour.

Hush fans provide you with an added layer of security. The safety switch and safety wire are inbuilt safety features that ensures no unruly episodes happens during an emergency.

Hush Premium and Premium Plus fans are powered by BLDC or Brushless DC Motors. Not only does it make them energy efficient but also aids them in working at low power or fluctuating power scenarios.

The fans also come with aero-perfected blades that ensure the breeze is spread across the room evenly.

REVERSE FUNCTION

The HUSH fans have enhanced reverse functional feature which enables an anti-clockwise movement of its uniquely engineered fan blades to create a chilled down-draft which significantly cools the room during summer, reducing the constant need for an AC. The clockwise rotation on the other hand creates a subtle updraft which gets the warm air near the roof to come down and spread evenly across the room, thus making it warm and pleasant during the winter.

SAFETY SWITCH

In the improbable event of the fan getting unfastened from the top-grip, the Safety Switch in the HUSH Fan, instantly shuts it down, thus reducing the possibility of any damage.

SAFETY WIRE

The HUSH fans have a built-in wire which is a safety mechanism to ensure protection in the event of the fan disengaging from the clamp.
